

Revolutionizing Game Finance with NFTS

The RealBig community uses Blockchain and AI technologies to solve issues with online lotteries, such as fairness and transparency. We offer a variety of lottery prize games. In addition to prize games, we offer NFT gaming finance via a virtual league.

NFT Virtual League

Our NFT game finance is based on a virtual league with 5 clubs and 70 players. Each club has 4 teams of different sizes. Every player in our virtual league is represented as an NFT asset. Our platform creates contest among clubs and teams. Users attend a pooled contest by guessing a winner. Anytime a player wins, its NFT owner receives 20% of the prize value as its royalty.
